

# Plan d'Action & UX Checklist — Meeting 3

---

Synthesized design fixes and UX improvements extracted from **Meeting 3** transcript, categorized by urgency and impact.

---

## ● Must Fix (Critical / Blocker)

### 1. RSVP Call-to-Action (CTA) Proportion & Ergonomics

- **Key Focus Area:** Call-to-Action (CTA) / Mobile Responsiveness
  - **Issue / Feedback:** Accept and Decline buttons lacked clear visual hierarchy and primary action emphasis on mobile viewports.
  - **Design Action Item:**
    - Redesign the main RSVP CTA bar using a **70% / 30% split layout**.
    - **Accept / Confirm (70% width):** High-contrast primary brand color, bold copy, prominent touch target (min 48px height).
    - **Decline (30% width):** Subdued secondary/outline button style to reduce accidental clicks while keeping the option accessible.
- 

## ● UX & Workflow Enhancements

### 2. Guest Confirmation (RSVP) & Dietary Preference Workflow

- **Key Focus Area:** User Experience (UX) & Workflow
  - **Issue / Feedback:** Guests need to view the menu before confirming and report dietary needs or severe allergies.
  - **Design Action Item:**
    - Integrate an interactive **Menu Preview Drawer/Modal** directly within the RSVP step.
    - Add multi-select tags for dietary options: **Halal**, **Vegetarian**, **Sugar-Free**.
    - Add a mandatory or optional free-form textarea for **Allergies & Dietary Restrictions**.
- 

### 3. Guest Management Dashboard & Quick Filters

- **Key Focus Area:** Invitation Redesign & Layout / Dashboard UX
  - **Issue / Feedback:** Organizers lacked an efficient overview to inspect guest responses across large events.
  - **Design Action Item:**
    - Implement pagination control (e.g., 10/25/50 items per page) on the Guest List table.
    - Add rapid filter pills at the top of the table: **All**, **Pending**, **Confirmed**, and **Declined** with active count badges.
- 

### 4. "Wrong Recipient" & Unsubscribe Option

- **Key Focus Area:** User Experience (UX) / Edge Cases

- **Issue / Feedback:** Misdirected invitations left guests without a clean way to flag errors or remove themselves.
  - **Design Action Item:**
    - Add a subtle footer link on the public invitation page: *"Not the intended recipient? Report error or unsubscribe."*
    - Create a brief confirmation dialog to remove the guest record cleanly without triggering error states for the organizer.
- 

## 5. Custom Dish Image Upload Module

- **Key Focus Area:** Workflow & Logic / Media Assets
  - **Issue / Feedback:** Using external image URLs for custom catering menus caused broken images and layout shifts.
  - **Design Action Item:**
    - Replace plain URL input fields with a native Drag-and-Drop Image Uploader component.
    - Display explicit client-side validation rules (e.g., *Max size: 5MB, Formats: JPG, PNG, WEBP*).
    - Provide an inline image cropper preview before finalizing uploads.
- 

## 6. Multi-Option Catering Configuration

- **Key Focus Area:** Invitation Redesign & Layout / Form Controls
  - **Issue / Feedback:** Catering needs vary between buffet setups, table service, or hybrid formats.
  - **Design Action Item:**
    - Add a segmented control toggle in the Catering Step: **Buffet**, **Table Service**, **Mixed/Hybrid**.
    - Conditionally display menu selection sub-forms based on the active catering type.
- 

## Design & Polish

### 7. Creation Stepper Ergonomics & Stepper Bar

- **Key Focus Area:** Visual Hierarchy & Ergonomics
  - **Issue / Feedback:** Creation wizard steps lacked visual clarity, progress feedback, and smooth navigation between steps.
  - **Design Action Item:**
    - Refine the Stepper UI header with clear step numbers, active state highlights, and completed checkmarks (✓).
    - Ensure full mobile responsiveness for the stepper (collapsing to progress bar or horizontal scrollable pills on smaller screens).
- 

### 8. Event Ownership & Metadata Display

- **Key Focus Area:** Layout & Branding
- **Issue / Feedback:** Created events must explicitly indicate the logged-in organizer owner for multi-organizer clarity.
- **Design Action Item:**

- Display an **Organizer Profile Badge** (Avatar + Name) on both the internal Event Summary card and the top header of the guest invitation view.

9. Down Payment & Settlement Tracker UI

- **Key Focus Area:** Layout & Visual Hierarchy
- **Issue / Feedback:** Financial tracking required visual clarity for cash and bank transfer advance payments.
- **Design Action Item:**
  - Design a 3-card metric summary bar in the Event Settlement tab:
    1. **Total Amount** (Neutral bold display)
    2. **Paid Amount** (Green success accent)
    3. **Remaining Balance** (Amber warning accent)
  - Add a modal form for recording custom down payments with payment type selectors (**Cash**, **Wire Transfer**).

10. Subscription Module De-emphasis (Paused Feature)

- **Key Focus Area:** Navigation & Workflow Scoping
- **Issue / Feedback:** Subscription billing logic is temporarily paused to prioritize core business features.
- **Design Action Item:**
  - Hide or disable the subscription/billing entry points in the main navigation menu to avoid user confusion.

 Summary Matrix

| Priority                                                                                               | Feature / Topic                    | Primary Canvas / Component  | Focus Area           |
|--------------------------------------------------------------------------------------------------------|------------------------------------|-----------------------------|----------------------|
|  <b>Must Fix</b>    | 70%/30% RSVP CTA Ergonomics        | Invitation Mobile Viewport  | CTA / Mobile UX      |
|  <b>Enhancement</b> | Menu Preview & Dietary Tagging     | RSVP Flow Drawer            | Usability / Workflow |
|  <b>Enhancement</b> | Guest Table Quick Status Filters   | Guest Management Dashboard  | Dashboard UX         |
|  <b>Enhancement</b> | Unsubscribe / Wrong Recipient Link | Invitation Footer           | Edge Cases           |
|  <b>Enhancement</b> | Dish Image Upload & Cropper        | Catering Configuration Form | Media & Form UX      |
|  <b>Enhancement</b> | Catering Type Selector             | Event Form (Catering Step)  | Workflow Logic       |

| Priority | Feature / Topic                 | Primary Canvas / Component | Focus Area               |
|----------|---------------------------------|----------------------------|--------------------------|
| ● Polish | Stepper Bar Progress Ergonomics | Event Creation Wizard      | Visual Hierarchy         |
| ● Polish | Organizer Ownership Badge       | Event Header / Preview     | Layout & Branding        |
| ● Polish | Settlement Summary Metric Cards | Financial / Billing Tab    | Visual Hierarchy         |
| ● Polish | Hide Subscription Nav Items     | Main Navigation Sidebar    | Information Architecture |
